

HOTEL REMODEL

Best Western used our custom made ledgestone panels to fit around their existing columns. They also used our Mountain Country Ledgestone Panels for the entrance. Our panels were installed quickly without disrupting guests.

HOTEL REMODEL

Comfort Suites used our large 4x8 panels to completely remodel their exterior and interior. Our large panels were installed very quickly and were easy to install on large buildings because of their size and light weight. The panels were also used to spruce up the inside. Unlike real rock our stone can be drilled into which allows you to hang whatever you want on your stone accent wall.

MY PLACE REMODEL

This hotel used our ledgestone panels and column kits in Desert Tan. They needed to cover a lot of square feet quickly. Our 4 by 8ft panels are the largest on the market and are installed easily.
