

ONE STOP SOURCE

WE DESIGN & FABRICATE, READY FOR INSTALL

At Replications Unlimited, we create value-added components and services for metal building projects. Our flexible product line includes Stucco Clad Panels, cornices, pilasters, custom trim options, and URESTONE Panels—the most durable composite stone, brick, and wood panels on the market.

Custom capabilities at our plant ensure that we can provide the necessary architectural elements for nearly any job. We strive to provide unparalleled service to customers with projects of virtually any size. We make this possible due to our integrated solution that shortens construction cycle times, reduces construction costs, and increases build quality.

FACTORY FABRICATED MODULAR SYSTEMS

Our custom capabilities set us apart from the competition. The URESTONE System uniquely combines lightweight and durable solutions with the ability to factory fabricate large architectural elements. Prefabricated elements ensure a fast and economical installation with quality appearance and long term performance.

METAL BUILDING ENHANCEMENTS & ARCHITECTURAL ACCENTS

Factory Mitered Corners

Customized corners produce natural and realistic transitions.

Column Wraps

Brick and stone column wraps are available.

Corners & Pilasters

Customized in widths between 12" and 48" and heights of 4'-8'.

Stucco Clad

EIFS alternative, customizable in size, pattern and color.

R-Panel Trim

Designed to fit the profile of most standard metal buildings.

Mansards

A modern alternative for EIFS, ACM or metal siding. Easy to install.

Custom Entrances

Includes columns, door headers, stone panels and cornices.

Dumpster Enclosures

Modular framing system designed to install without footing or posts.

Custom Design Services

We develop unique exterior and interior options for any project.
