

PROJECT DETAILS

Location: St. Clair, MO
Size: Various
Construction Type: Remodel

CHALLENGES:

Warrenton Oil was looking for a solution to upgrade the curb appeal of their FastLane Convenience Store Travel Centers in the mid-Missouri region. Our main challenge was to match the existing stone at their other stores to keep consistency throughout their locations.

SOLUTIONS:

Replications Unlimited showed up on-site to provide ideas and to take critical measurements to ensure a quick and smooth transition for the design of their entrance. The entrance was factory custom-built at RU utilizing the critical on-site dimensions which were paramount in keeping customer inconvenience down to a few days during construction. When the product arrived, the contractors assembled the sections of the Gray Manor Stone Entrance and Chestnut Clean Brick for an exact fit. WOCO saved about 28% on this project by using URESTONE Composite Panels resulting in a quick, cost-effective new entrance and look.

PRODUCTS:

- LEDGESTONE WAINSCOT • CUSTOM LEDGESONE ENTRANCE • CLEAN BRICK
- CUSTOM CORNICE

Stone Matching:
