

PROJECT DETAILS

Location: Omaha, NE
Size: Various
Construction Type: Remodel

CHALLENGES:

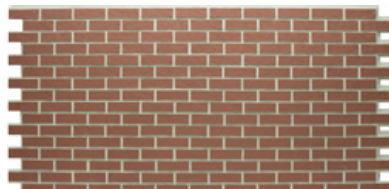

Western Oil was looking for a solution to upgrade the curb appeal of a series of recently purchased independent convenient stores. On this particular location, the building was a masonry CMU building built in the 1970's that became dated and was in need of a facelift.

SOLUTIONS:

Replications Unlimited's in house design team offered up several mock-up designs before deciding on this layout. A complete package of stone, custom factory fabricated columns, brick and custom cornice work was incorporated to not only change the texture on the building, but the complete building profile.

PRODUCTS:

LEDGESTONE WAINSCOT • CUSTOM LEDGESONE CORNERS • CLEAN BRICK
CUSTOM CORNICE

Installation Process:
